-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claim(s) 1-6 and 13, drawn to an underwater discharge core including the technical features of a frame, first and second platinum plate meshes and an insulating plate mesh arranged in an overlapping manner.
- Group II, claim(s) 15-19, drawn to a sterilizing water generator including the technical features of core installed within a container, the core including a frame, first and second platinum plate meshes, and an insulating plate.
- Group III, claim(s) 22-26, drawn to a sterilized water supplying system including the technical features of a filtration unit, a core including positive and negative terminal of platinum plate mesh, a water storage tank storing the water sterilized by the core, and a power source/controlled unit.
- Group IV, claim(s) 42-44, drawn to an underwater discharge core including the technical features of a frame including a rectangular opening, a first platinum plated mesh with X-axis bars and a second platinum plated mesh with Y-axis bars.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding *special* technical features for the following reasons: any common technical features among two or more of the groups (a frame, first and second plate meshes, an insulating plate) are disclosed by KR1998-0066632. Therefor, these features are not *special* technical features.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Terry K. Cecil whose telephone number is (571) 272-1138. The examiner can normally be reached on 8:00a-4:30p M-F..
